SUMMARY

Data Analytics Consultant with 5+ years of experience delivering data transformation, governance, and analytics solutions across retail, manufacturing, healthcare, insurance and enterprise technology sectors. Proven track record leading complex analytics projects, establishing data governance frameworks, improving data quality, and designing scalable reporting solutions that support strategic decision-making and business transformation. Hands-on expertise in **Power BI, Microsoft Fabric, Databricks, Tableau, SQL, Python, Azure Data Factory, Snowflake, and SAP S/4HANA**, with strong experience in **data modelling, ETL/ELT pipelines**, secure data management, and stakeholder analytics delivery. Experienced in facilitating workshops, gathering requirements, presenting executive insights and translating business needs into analytics outcomes. **MSc Business Analytics (UCD). Passionate about Data Scientist position.**

CAREER EXPERIENCE

Inventory Control Specialist **08/2024 – Present**
Tesco *Dublin, Ireland*

- Performed cash reconciliation and supported quarterly audits using Excel, SQL and Power BI, ensuring timely reporting.
- Developed standardised documentation and audit checklists, improving process consistency and reducing reporting errors across operational workflows.
- Establish and maintain data governance standards, reporting frameworks, and structured data documentation to improve consistency, quality, and secure handling of business data.
- Contributed to process improvement and automation initiatives that enhanced reporting efficiency and overall team performance **by 20%.**

Research Intern – Fraud Analytics and AI **02/2024 – 07/2024**
Union Alcoyana Seguros *Dublin, Ireland*

- Applied **advanced analytics machine learning models** (Random Forest, XGBoost, MLP) to analyse transactional data, analyze fraud risks and segmentation and support strategic decision-making.
- Enabled natural language querying capabilities using **RAG and LLM tools**, business users to explore data patterns and KPI insights without technical intervention.
- Supported business teams by preparing structured datasets, analytical reports, problem solving and **Power BI** dashboard outputs for strategic decision-making using **DAX and Power Query.**
- Collaborated with stakeholders to gather requirements, validate data outputs and deliver analytics that improved fraud team response time and prioritisation accuracy.

Business Intelligence & Senior Data Analyst **10/2019 – 08/2023**
Print-O-Fast *Bareilly, India*

- Led delivery of data analytics and business transformation projects, improving **operational efficiency by 25% and contributing to 15% revenue growth** through advanced analytics & business improvements.
- Designed and implemented data governance frameworks, data dictionaries, and metrics methodologies to establish consistent, secure, and scalable business reporting standards.
- Built **Power BI and Tableau dashboards** as enterprise analytics products, creating a single source of truth for commercial, operational, sales and financial reporting.
- Developed and maintained **ETL/ELT pipelines** using **PySpark (SQL) on Databricks** and data models in **Snowflake** to improve reporting **by 40%** and improve data accessibility.
- Developed data quality frameworks and validation procedures to improve reporting accuracy, statistics and acceptance criteria in analytics outputs.
- Facilitated stakeholder workshops and client business review sessions to gather requirements, define KPIs, and develop tailored analytics solutions.
- Built **AI/ML predictive models** for **demand forecasting and customer analytics, segmentation** and supporting **$2M+ strategic revenue opportunities.**

SAP (ERP) Technical Consultant **06/2016 – 08/2019**
Tata Consultancy Services *Bangalore, India*

- Designed and implemented **SAP ABAP ERP** solutions for global pharmaceutical clients, delivering development and compliance reporting within **SAP S/4HANA** environments.
- Collaborated with cross-functional stakeholders in the sprint planning to gather requirements and design QA features solution, **earning two STAR Awards for outstanding delivery.**
- Coordinated **User Acceptance Testing (UAT**), aligning test cases with business requirements and validating BI data outputs, ensuring data integrity and system reliability.

- Worked in **Agile and Waterfall project environments**, delivering technical documentation and system enhancements in daily **scrum team** stand-ups.
- Mentored new team members through onboarding, automation, technical excellence and continuous learning.

EDUCATION & CERTIFICATIONS

MSc Business Analytics (Data Science) **2023 - 2024**

- *University College Dublin (UCD)* *Dublin, Ireland*

Business Intelligence, Data Engineering, Statistical Modelling, Machine Learning, Analytics Strategy

B.E. (Hons) Mechanical Engineering **2011 - 2015**

- *Rajiv Gandhi Proudyogiki Vishwavidyalaya* *India*

Certifications

- Data Analytics | SQL | Tableau | Large Language Models | Generative AI | ETL | PySpark | Neural Networks

COMPETENCIES

- **BI & Visualisation:** Power BI | Microsoft Fabric | Databricks | Tableau | SQL | Python | Snowflake | Azure Data Factory | AWS | SAP S/4HANA | Excel | R | PowerPoint
- **Data Engineering:** ETL/ELT Pipelines | Data Modelling | Data Sanitisation | Data Storage | Data Manipulation | Metrics Computation | Reporting Automation
- **Frameworks:** Pandas | NumPy | Scikit-learn | TensorFlow | PyTorch | PySpark | Project Management
- **Analytics Platforms & Tools:** Customer Segmentation | Fraud Detection | Predictive Forecasting | Clinical Data Analysis | Commercial Sales Analytics | KPI Reporting | RAG | LLMs | Prompt Engineering | NLP | Entrepreneurial
- **Soft Skills**: Problem Solving, Communication Skills, Teamwork Skills | Stakeholder Workshops | Requirements Gathering Client Advisory | Project Delivery | Project Planning | Scope Management | Executive Reporting | Proposal Support
- **Data Analytics & Governance:** Data Governance Frameworks | Data Quality Frameworks | Data Management Policies | Data Dictionaries | Secure Data Sharing | Data Validation | Data Transformation | Computer Science
